Your LowCode Platform

Process Focused LowCode Platform

BiMSER Synergy, "Process Focused Low Code Platform," helps you migrate your processes to a virtual environment, eliminate unnecessary approval waiting processes, and use your resources effectively. It allows you to establish the highest level of relationship between content and processes, accomplishing this by associating processes with the documents that constitute the input or output of those processes and ensuring quick access by the right individuals.

You can choose to use any of the **Basic, Business, and Enterprise** packages of the **Bimser Synergy Low Code Platform**, each of which includes different modules based on your needs.
